STATE OF THE ART/ ADVANCED TECHNOLOGY

Advanced Ultrasound Technology:

Patients benefit from the latest advancements in wound care technology that revolutionizes wound care today. We provide an FDA approved gentle, yet highly effective debridement technique for chronic and non-healing wounds that minimizes pain and discomfort for the patient. This technique penetrates the wound bed 1cm deep destroying up to 100% of all bacteria

ADVANTAGES:

- Destroys Bacteria and Biofilm
- Stimulates Circulation
- Preserves Healthy Tissue
- Protects Granulation Tissue
- Minimizes Pain and Discomfort
